

## **IFIP TC3 Doctoral Consortium 2023**

### **Call for Participation**

We are happy to announce the first ever online Doctoral Consortium (DC) organised by IFIP Technical Committee 3: Education, together with all its Working Groups. We warmly invite doctoral students from all fields of education involving digital technologies to participate.

#### **Overview**

The IFIP TC3 Doctoral Consortium 2023 is a forum for PhD students working on topics related to education and digital and information technologies to discuss their research goals, methods and results at an early stage of their research. It aims to provide useful guidance about the completion of doctoral research and the initiation of research careers in a friendly and constructive atmosphere. The DC provides an opportunity for student participants to interact with senior researchers in the field.

The IFIP TC3 Doctoral Consortium 2023 is a free online event. As a TC3 activity, participants can also take advantage of the opportunity to become a corresponding member of some of the TC3 Working Groups (WGs), a first step towards full membership.

#### **Dates**

The Doctoral Consortium will be held in May 2023. Once the participants have been selected and depending on the available time slots, the final dates will be announced.

#### **Eligibility**

Doctoral Consortium candidates should have chosen a research focus and also have selected theoretical and methodological approaches and begun to conduct their research. To benefit from the DC, students are recommended to have at least 12-18 months of work remaining before the expected completion of their theses. The number of participants in the Consortium will be limited. Selection for the DC will be based on the quality of the submission, its relevance to IFIP TC3, and the potential benefit of the Consortium to the student's research.

#### **Submission Guidelines**

Students that meet the eligibility requirements should submit an application using the attached template before March 31, 2023.

#### **Review Process and Notifications**

Acceptance letters will be sent no later than April 15, 2023.

#### **Doctoral Consortium Organising Committee**

Christine Bescherer – Session Chair

Christophe Reffay (IFIP TC3 Executive Committee - Working Group Liaison)

Torsten Brinda (IFIP TC3 WG3.1 chair - Informatics and Digital Technologies in School Education)

Cathy Lewin (IFIP TC3 WG3.3 chair - Research on Education Applications of Information Technologies)

Jaana Holvikivi (IFIP TC3 WG3.4 chair - Professional, Higher and Vocational Education in ICT)

Javier Osorio (IFIP TC3 WG3.7 chair - Information Technology in Educational Management)

#### **Further Information**

If you require any further information, please contact Javier Osorio, E-mail: [javier.osorio@ulpgc.es](mailto:javier.osorio@ulpgc.es)

#### **TC3 within IFIP**

The [International Federation for Information Processing \(IFIP\)](https://www.ifip.org/) is a worldwide organisation for researchers and professionals working in the field of Information and Communication Technologies (ICT). IFIP links currently 48 national societies and academies of science, and operates on a non-governmental, non-profit basis.

Activities are coordinated by Technical Committees (TCs). Each TC covers particular aspects of computing and related disciplines, ranging from Computer and Information Systems to Artificial Intelligence.

[TC3](#) covers many aspects of the important field of education, from technology enhanced learning to computing education. Much of TC3's work is done in Working Groups. If you are interested in becoming a member, see the Working Groups page and contact the Chair of your preferred group.
